Nationalist Popular Front Platform

"If ye love wealth better than liberty, the tranquility of servitude than the animated contest of freedom, go from us in peace. We ask not your counsels or arms. Crouch down and lick the hands which feed you. May your chains set lightly upon you, and may posterity forget that you were our countrymen!"
— Samuel Adams

-2020-

Preamble: The future of American society is determined by “elected” representatives who serve only to line their pockets with money. The American Dream is dead and the Democratic and Republican party has killed it. There is no future for America under the liberal institutions of these two parties, while the GOP entrenches itself in terror of any real conservative change the NPF proudly stands up for traditions and American values. The Democrats serve only to further delude the general populace that they are the “progressive” front for “change”. Meanwhile, their actual policies in office have hurt the ones they so claim to help. All this goes on while the Civic People’s Party does nothing but remain as a force for legislative instability. Never picking a clear direction as each of their representatives holds different values. What we do know about the CPP however, is how perfectly they represent the lack of an alternative for America. People are so disillusioned they are willing to vote for literally anyone else. No longer will this stand. The NPF wants three things; An American Dream for every American, the promotion of traditional values, and keeping America safe. Look no further than the NPF as the future of strong legislation. We will uphold all the values that keep us great as a united union and nation.

Abortion: Abortion is a supposed touchy subject. The fact that we even have such a debate is indicative of just how decadent American society truly is. Too many years have we gone without looking at the values that make us great. The sanctity and protection of life are at all times promoted by the NPF. We wish to protect the lives of those unborn. We will not rest until the sanctity of life is upheld. The government, under no circumstances, should be allowed to publicly fund abortion, euthanasia, or suicide. Planned Parenthood and other such vile organizations should no longer receive federal funding for murder. Additionally, we wish to ensure that abortions are not performed in our great nation. The National Popular Front wants to hold people responsible for their actions, so committing feticide should be punishable by the law, for the utmost preservation of life. We, like most Americans, do not support the decision of Roe v. Wade. Looking at the Declaration of Independence itself we can read that we are endowed by our creator with certain unalienable rights. We support the Declaration of Independence and see that ultimately we have gone too far without upholding morality. Under God all life is sacred and we respect that. The NPF does not support the supposed “right to an abortion”, much like we do not support any sort of right to commit manslaughter legally.

Immigration: The NPF not only condemns but will actively work to curb illegal immigration. We have seen the Democrats open our borders and promote the flooding of our nation by illegal immigrants. Republicans failed to pass legislation to protect the nation from the harm of illegal immigration. These illegal immigrants are then eligible for public assistance, such as education, social security, housing, and legal services. We do not support the policies that protect illegal immigrants from facing consequences for their actions. In any other context, we do not reward people for committing illegal acts and we should hold illegal immigration to the same standards. Our liberal establishment has up to this point welcomed illegal immigration through granting temporary or permanent legal status and allowing them to use the welfare meant to go to American citizens. We support stricter immigration laws that are tough on illegal immigration, such as no longer allowing those born on American soil to undocumented parents to receive citizenship automatically. Imposing sanctions on nations that allow their citizens to easily cross over to American soil illegally. A priority for the party is to curb the abuse of the H-1B and L-1 visa provisions of the immigration act. We want to promote the widespread verification of citizenship or legal residency in schooling, the workplace, and government branches. American companies should no longer rely on cheap illegal labor that disenfranchises the American worker. The foundation of America's history as an immigrant nation is overshadowed by dangerous liberal policies allowing for if not promoting widespread illegal immigration. Legal immigration has however escalated to one million each year, schools are overcrowded, traffic is congested, and the pressure of resources such as water electricity is great stress on the nation. Restraining our intake of legal immigration to focus on the nation's ability to support its population is a priority for the NPF

Gun Control: The 2nd Amendment limits interference with gun ownership by stating: "A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." The majority of Americans own firearms to keep themselves and their families safe. It is vital to the fabric of our nation to uphold the right to bear arms. Too long have the Democratic liberal establishment limited the ownership of firearms. We promote the ownership of firearms by any means. It is one of our major policies. Every law-abiding American citizen should have the right to bear arms and defend themselves from the tyranny of the government. We call for the federal government to take an active stance for the protection of the ownership of firearms, the repeal of all federal firearm legislation is necessary to our upholding of the 2nd amendment. Additionally calling for the rescinding of executive orders that prohibit and restrict the ownership of firearms. It is the right of every American to own a firearm if they so please, and we emphasize how little respect the Liberal institution has for this very right. We will vote on legislation that opens up accessibility to firearms for law-abiding American citizens and promoting education on the usage of firearms.

Death Penalty: We believe that as long as there is appropriate due process in the case of the death penalty it should be allowed and declared constitutional. Often, opponents of the death penalty exaggerate the clause of cruel and unusual punishment. Which requires a moral definition of what is cruel. The ultimate penalty in society should be the death penalty. Deprivation of life should be an option for the worst of crimes. The National Popular Front promotes the protections of the defendants in criminal case proceedings. The protection of the innocent from wrongful imprisonment with the presumption of innocence until proven guilty. Our criminal justice system is riddled with problems, we often prosecute the wrong people, imprison the innocent, and free the guilty. It is vital to the integrity of America as a free nation that rulings are unbiased and not motivated by personal or political agendas. Due process is stressed by the NPF as important to maintaining the legality of the death penalty. The death penalty should be restricted by congress for select crimes and those crimes eligible should have clear constitutional mandate and instruction. Instead of allowing for the political or personal bias of a judge to decide the life of a person, the jury will determine if the death penalty should be sentenced to the death penalty. We call for reform of our criminal justice system that is deeply flawed. Until such a time the NPF will call for a suspension of the Death Penalty in keeping with our standard of the sanctity of life.

Education: America is a great sophisticated nation, we support continuing our tradition of outputting the most educated professionals that are respected in their respective fields. It is fundamentally unconstitutional for the state to have control over education. We promote the return of this right to the state and individual parents. Parents should be able to decide what is best for their children; whether it be private, home, charter, or public schooling. We want to decentralize state control over our children's education. Limiting it only to local officials who are elected by-elections. No longer will our schooling be influenced by the interests of private corporations or other such private interests. Discontinuing the national curriculum and sex education, where what is and what is not taught should be decided by paternal relationships or elected local officials. The promotion of the ability of parents to educate their children is important to the NPF. The future continuation of our nation is dependent on those who we educate under it. The NPF will not and does not support any legislation that would allow for the rights of parents to be overstepped. Education in America should no longer be dependent on the state and what the state and those who control it want you to know.

Foreign Policy: The foreign policy of the nation should serve the people and the nation utmost. US involvement in foreign treaties or agreements only serves to help those in the executive branch and not any individual people. We are a free and sovereign republic and our foreign policy should mirror this. Maintaining peace with other nations meanwhile not interfering in their affairs is important to us. International organizations such as the United Nations undermine our status as a sovereign nation. Barring international groups from operating on our territory and prohibiting the US Government from entering any treaty or agreement that commits the American Government to military service or taxes. We do not support any compromise on our sovereignty as a nation. American troops are to serve only American commanders and no other foreign international interest group. America has committed itself to safeguard all nations by signing agreements or treaties that will force us into the wars of other nations. The National Popular Front does not support any American blood to be shed on the battlefields of other nations for wars we are not even supposed to be involved with. We additionally do not support wars that are either unconstitutional or undeclared that Democratic and Republican administrations have put us in. We support that the United States maintains the Monroe Doctrine, which opposes European adventurism in the Americas. The NPF does not support Foreign Aid in any form, instead of investing our money into our nation, we are supporting those of other nations.

Economic Growth: America has continuously wasted our money on bloated federal programs and does not match the scope of our federal government. Our priority is to build the independence of the nation and the best way to do this is to pay down the Federal Debt the quickest that we can. American taxpayers should no longer be held responsible for the debts of the nation. Paying off our debts will allow us to focus on the nation first and foremost. Promoting a common-sense approach to economics in legislation by establishing estimates of the costs of federal programs and efforts. Scaling back social programs that had spent more money than needed. Establishing a committee for reviewing existing government programs for cost-efficiency. Removing all trust fund balances from the budget deficit calculations which allows the American people to realize the scale of our national debt. We deeply stress the importance of establishing a debt-free America. We see any national debt, unfunded commitments, or trade deficits as a responsibility of the Federal government. Pulling out funding for the United Nations, Welfare, and other special interest subsidies.

Trade Policy: The NPF promotes trade between foreign nations and America, as long as they abide by the U.S constitution and eliminates trade deficits. Other nations see our workers and our industry as things to bargain with for the dominance of multinational corporations to abuse. A trade ban on all imported products made of child, prison, or slave labor. Meanwhile, we wish to protect the United States' jobs and industry. We wish to impose "Buy American" policies that promote the patronization and purchase of American goods through either tax credits or other financial motivations. Revoking Most Favored Nation status from all nations that impose on human rights. As well, we wish to only allow trade when the US cannot only feed its people but also manufacture and stockpile all products needed to keep America strong. Imported food should be labeled as such and imported minimally. Returning to congress the power to limit trade and impose tariffs and sanctions. The National Popular Front wants the US to withdraw from trade agreements worldwide, and empower tariffs on all imports. Tariffs can be used as a source of constitutional revenue that can, when administered wisely, can preserve the national economy. All to achieve a balance in trade. Free trade policies that America thinks helps its national debts are harming it. By being self-sufficient through bilateral trade and negotiation with other nations.

signed,

This platform is the official platform of the NPF as designed by the platform committee of 2020, approved and signed by the Chairman of the National Executive Committee and passed a majority vote in the National Executive Committee.
